

## **Natural avalanches on NE face of Fan**

Date

Sun, 11/27/2022 - 17:10

Saw natural avalanche debris below the cliffs on the NE face of Fan from the resort. Tons of wind loading the last few days. Light wasn't good to get a clear picture. Looked like a few different smaller avalanches but could have gone all at once.

Region

Northern Madison

Location (from list)

Fan Mountain

Observer Name

Edward North
