

Divide Pk Wind loading

Date

Tue, 01/16/2024 - 11:01

Activity

Snowboarding

On my tour up the main fork of Hyalite today I noticed two slides near Divide Peak caused by wind loading. There was a wind skim on all snow surfaces in the Basin and I experienced a bit of collapsing while walking across the basin in the flats on small wind loaded pockets

Region

Northern Gallatin

Location (from list)

Divide Peak
