

Obs from bridger range

Date

Sun, 03/24/2024 - 15:35

Skied in Frazier and fairy lake area today. No signs of instability or wind loading on the north facing slopes we skied. We found a very firm crust layer under a few inches of new snow. The new snow was sluffing quite easily but wasn't consolidated. It was lightly snowing all day but no wind to speak of moving the new snow around.

Region

Bridger Range

Location (from list)

Frazier Basin
