

A Pair of Small Avalanches on Saddle Peak

Saddle Peak

Bridger Range

4/3/2025

Code

AS-R1-D1-S

Elevation

9000

Aspect

NE

Latitude

45.79430

Longitude

-110.93600

Notes

I was skiing in bounds on Slushman's lift and saw a pair of R1, D1 avalanches on Saddle Peak. One appears to be a [loose snow avalanche](#) triggered by a skier coming off of north Saddle Peak That ran a couple hundred feet. The second was a small [slab](#) coming out of Spencer's with debris running into Going Home Chute.

There were many tracks across the visible Saddle Peak terrain.
